

SHUTDOWNS, TURNAROUNDS AND OUTAGES

ATIVO Maintenance & Project Services is a trusted provider of maintenance and project solutions to the mining and resources, manufacturing, energy, infrastructure and industrial sectors across Australia.

We operate with a relentless focus on safety and are committed to our goal of zero harm to people, plant and the environment. ATIVO is known for its 'can-do' approach and commitment to service excellence. Our vision is to be Australia's most trusted provider of maintenance and project services.

ATIVO Maintenance & Project Services is a member of the SKILLED Group of companies.

ATIVO'S SHUTDOWN SERVICES

- Scoping and planning of works
- Detailed scheduling and critical path tracking
- Rapid mobilisation through our national FIFO capability
- Fully supervised and competency-assessed work teams
- Specialised tooling and logistics
- Contractor and supplier management.

ATIVO provides tailored shutdown and outage solutions to clients across diverse industry sectors and locations, delivering over 150 outages each year.

ATIVO's shutdown services range from shutdown support, supplying supervised and experienced shutdown teams, through to complete shutdown management, planning and execution.

When involved at a planning level, ATIVO's shutdown specialists either integrate with the client maintenance team or work with ATIVO's Shutdown Manager to plan and execute complex and unique shutdown projects on time, on budget and most importantly, safely.

ATIVO understands that the key to operational success is pro-active preventative maintenance. Working with clients to review shutdown plans and maintenance cycles, ATIVO ensures suitable and flexible shutdown teams are available.

To execute and resource shutdowns, ATIVO draws upon a team of experienced shutdown supervisors and tradepeople who bring knowledge from multiple sites across Australia and overseas. ATIVO's national FIFO capability also means we can service challenging and remote locations. We provide self-sufficient shutdown teams, generally based around a core team who work together regularly, along with on-site supervision, safety and engineering support.

As a member of SKILLED Group, ATIVO has access to over 90 regional and metropolitan recruitment hubs to support large-scale crew mobilisation for major outages.

Mill Reline Services

Through Pacific Relines, a business unit operated by ATIVO, we also offer mill relining plant maintenance services. Pacific Relines supplies specialist personnel and equipment to reline grinding mills and crushers at hard rock mining sites.

Pacific Relines undertakes over 80 reline and installation projects across Australia and the Pacific Region each year. The services offered include liner change outs, new installations, and overhauls on crushers, chain and box feeders, launders, scrubbers and dryers.

Delivering safe, reliable and flexible shutdown service solutions

Safety culture, leadership and performance

Safety is our first corporate value and what ATIVO considers its licence to operate. We are committed to our goal of zero harm to people, plant and the environment. Operating in shutdown environments, our safety management system and behaviours are critical. With diverse industry experience and a certified online safety management system, ATIVO is able to share safety initiatives and innovations from one shutdown to another.

Highly competent, committed shutdown teams

One of the key reasons for ATIVO's success in delivering over 150 shutdowns each year is the continuity of our core team members and supervisors. By permanently employing our core team and implementing a range of retention strategies and incentives, we have access to an integrated and trusted group of tradespeople. Our shutdown team members undergo competency-assessments so we can have confidence in our service quality. Our recruitment and resourcing staff we believe are some of the best in the business. Through their commitment we are able to consistently provide high quality shutdown teams and mobilise them quickly.

A flexible and nimble approach

Our clients tell us we are easy to work with - they know that we go to great lengths to find the best and most suitable shutdown teams to meet their needs. We work with clients to determine the most cost-effective and appropriate solution - be it a total shutdown management service or simply providing a one-off shutdown support team.

Outcome focused

Taking a whole-of-life approach to asset management, ATIVO always focuses on meaningful outcomes for clients. Be it maximising asset utilisation, continuous improvement, or sustained operational excellence we align our objectives with those of our clients. In other words, we treat client assets as if they were our own. This approach ultimately determines our success.

Our clients

Clients look to ATIVO as a trusted provider of safe, reliable and flexible shutdown solutions. The following organisations are just some that have benefited from ATIVO's shutdown services:

- Alcoa
- Amcor
- Barrick Gold
- Bechtel
