

Geoscience Australia - ACT

- Full Site Facilities Management
- ZERO HARM
- Experienced Onsite FM Management
- On Call Services
- Subcontractor Management
- Broad Scope of service - delivery
- Client Commendations

ATIVO's commitment to providing a comprehensive Facilities Management service with a dedication to safety, performance and client satisfaction has seen ATIVO engaged by Geoscience Australia for over 11 years.

Since 1998 ATIVO has been delivering full facilities management (FM) services to the Geoscience Australia (GA) facilities at Symonston, Fyshwick and Kowen Forest in the ACT as well as the ACRES Satellite Receiving Facility in Alice Springs, NT.

ATIVO crew at GA consists of one full time FM Manager located on site with a support team including administration accounts clerk, receptionists, electricians and a mechanical fitter. The ATIVO FM Manager also administers any additional subcontractor management to carry out services as required.

In a recent independent contract review ATIVO was highly commended on their service delivery for managing these very technical GA facilities.

The ATIVO crew undertake an extensive range of operational support and maintenance services and a sophisticated management regime that includes planning, record keeping, quality assurance and other pro-active services designed to achieve the objectives set out in the contract. Services include:

- Building and site security operation as well as maintenance services
- Refurbishment works (2008-2009 Robotics Storage Facility & Storage Room upgrade)
- Front desk receptionist/telephonist service
- Cleaning, hygiene and Waste Management service
- Landscape maintenance and horticultural service, vermin and pest control, building condition monitoring
- Building and infrastructure maintenance and repairs
- Data recording and coordination service
- Fire safety services, defect and warranty control services
- Maintenance and Asset Management service for plant, equipment and engineering services, Call out service for plant faults
- Bottled gas monitoring and replenishment
- Luminaire lamp replacement service, energy management service
- Computerised control system operation and maintenance
